Authorization for this examiner's amendment was given in a telephone interview with Bruce D. Jobse (Reg. No. 33,518) on 5/14/2012 to place the application in condition of allowance.

The application has been amended as follows:

In the Claims:

Claims 1, 7, 8, and 10 have been amended as below.

1. (Currently amended) A method of operating a set of devices comprising:
receiving a real-world description in the form of an instruction set of a markup language, the real-world description including asset terms and effect terms,
requesting assets associated with the asset terms and effects associated with the effect terms in the real-world description,
modifying at least one asset associated with an asset term in the real-world description according to at least one effect associated with an effect term in the real-world description, and
operating the devices according to the at least one modified asset.

7. (Currently amended) A method according to claim 1, and further comprising distributing the real-world description amongst the devices of the set.

to request assets associated with the asset terms and effects associated with the effect terms according to the terms in the real-world description, and

to modify at least one asset associated with an asset term in the real-world description according to at least one effect identified by associated with an effect term in the real-world description, the devices of the set being operated according to the at least one modified asset.

REASONS FOR ALLOWANCE

9. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach, in combination with other claimed limitations, receiving a real-world description in the form of an instruction set of a markup language, the real-world description including asset terms and effect terms, modifying at least one asset associated with an asset term in the real-world description according to at least one effect associated with an effect term in the real-world description as recited in independent claims 1 and 10.

These claimed limitations are not present in the prior art of record and would not have been obvious, thus the pending claims 1-15 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2191

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
